ILLUSTRATED PARTS CATALOGUE

INTRODUCTION

This Illustrated Parts Catalogue (IPC) contains information on the Middlebridge Scimitar built from Dec 1988.

The catalogue has been published for your convenience in ordering genuine service and replacement parts.

The parts on the Illustrated plates serve the purpose of part identification and, therefore, are not necessarily in exact conformity with parts actually serviced/fitted to all vehicles.

Trim parts are listed as "interior trim numbers" due to the vast range of colours. Exact part numbers are available when the colour/finish has been established.

Detail engine/gearbox parts are available upon request.

Some components are purchased by Middlebridge Scimitar Ltd. as total assemblies, therefore not all parts are available separately.

TECHNICAL QUERIES

Any queries on fittment/useage of any components or non-illustrated parts should be addressed to Engineering Dept.

Parts used on the Middlebridge Scimitar cannot be guaranteed to fit other vehicles, please check first.

UPDATES

Regular updates will be forwarded to all nominated copy holders to cover new or improved components.

The date on the top of the text sheets shows the latest level.

This diagram illustrates the assembly of a fuel system component, likely a fuel filter or regulator. The main assembly is shown in a perspective view, with a circular inset providing a detailed view of the internal valve mechanism. The components are numbered as follows:

- 1**: A long, flexible fuel line with a 90-degree elbow.
- 2**: A mounting bracket with a threaded hole for a screw.
- 3**: A small O-ring or seal.
- 4**: A small screw or pin.
- 5**: A threaded fitting or connector.
- 6**: A small O-ring or seal.
- 7**: A large screw or bolt used for mounting.
- 8**: A cylindrical component, possibly a filter or regulator body.
- 9**: A small O-ring or seal.
- 10**: A short fuel line segment with a threaded end.
- 11**: A fuel line segment with a 90-degree elbow.
- 12**: A curved fuel line segment.
